

KANCHARLA TRIDEV SANJAY

AI Engineer — Generative AI — Machine Learning — Python — Prompt Engineering

📍 Chennai, Tamil Nadu, India 📞 +91 9949128732
✉ tridevsanjay06@gmail.com [in LinkedIn](#) [GitHub](#)

PROFESSIONAL SUMMARY

AI Engineer and B.Tech graduate in Artificial Intelligence and Machine Learning with hands-on experience developing Generative AI applications, Machine Learning solutions, intelligent automation systems, and full-stack AI products. Skilled in Python, FastAPI, Prompt Engineering, LLM-powered applications, Data Analytics, and AI deployment. Experienced in building scalable AI-driven systems that automate workflows, generate intelligent insights, and enhance user experiences. Passionate about Artificial Intelligence, Machine Learning, and developing innovative AI solutions for real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL

AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, Prompt Engineering, NLP, LLM Applications, Predictive Analytics

Frameworks & Libraries: FastAPI, Scikit-learn, React.js, Node.js

Data Science: Data Analysis, Data Preprocessing, Feature Engineering, Model Evaluation, Data Visualization

Databases: MongoDB, MySQL, PostgreSQL

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Docker, Git, GitHub

AI Tools: OpenAI APIs, LLM Integration, AI Workflow Automation, REST APIs

Core Concepts: Problem Solving, Software Engineering, Agile Development

EXPERIENCE

Backend Developer Intern – Hewlett Packard Enterprise (HPE)

Nov 2025 – Dec 2025

- Developed backend services and REST APIs supporting enterprise software applications.
- Designed and optimized database operations for efficient data processing and retrieval.
- Collaborated with cross-functional teams to deliver scalable software solutions using Agile methodologies.
- Improved application performance through debugging, testing, and code optimization.
- Utilized Git and GitHub for version control, collaboration, and deployment workflows.
- Gained hands-on experience in software engineering best practices and system design.

PROJECTS

VideoForge AI [\[Live Demo\]](#)

Python, FastAPI, React.js, MongoDB, Generative AI, Prompt Engineering

- Built an AI-powered platform that converts product documentation into professional video scripts, storyboards, and marketing content.
- Engineered prompt workflows using Large Language Models (LLMs) to automate content generation and improve output quality.
- Developed scalable REST APIs using FastAPI for AI inference and content processing.
- Designed responsive React.js interfaces enabling seamless user interaction with AI-generated outputs.
- Integrated MongoDB for efficient storage and retrieval of generated content and user data.
- Reduced manual content creation effort by automating script generation workflows through Generative AI.

CampusConnect AI – Smart Student Networking Platform

Python, React.js, Node.js, MongoDB, Machine Learning

- Developed an intelligent student networking platform connecting students based on academic interests, technical skills, and career goals.
- Implemented recommendation algorithms to suggest relevant peers, communities, events, and project collaborators.
- Built RESTful APIs and backend services for profile management, networking features, and recommendation workflows.
- Developed responsive front-end interfaces using React.js to improve user engagement.
- Utilized MongoDB for scalable storage and retrieval of user profiles and activity data.
- Enabled AI-assisted discovery of mentors, collaborators, and opportunities across the campus ecosystem.

AI-Powered Carbon Footprint Calculator

Python, Scikit-learn, Machine Learning, Data Analytics

- Developed a predictive machine learning model achieving 85% accuracy for estimating individual carbon emissions.
- Implemented end-to-end ML workflows including data preprocessing, feature engineering, model training, and evaluation.
- Applied regression algorithms and statistical analysis techniques to generate sustainability insights.
- Optimized model performance through hyperparameter tuning and feature selection.
- Generated actionable recommendations to help users reduce environmental impact using data-driven predictions.

EDUCATION

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology

2022 – 2026

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning

CGPA: 8.0/10

CERTIFICATIONS

- Artificial Intelligence Professional Certification – OneRoadmap
- Generative AI Certification – Infosys Springboard
- AWS Solutions Architecture Job Simulation – Forage
- Hewlett Packard Enterprise Software Engineering Virtual Experience Program
- Google Cloud Fundamentals

ACHIEVEMENTS

- Built and deployed multiple AI-powered applications utilizing Generative AI and Machine Learning technologies.
- Developed end-to-end AI solutions integrating frontend, backend, and cloud technologies.
- Demonstrated expertise in Prompt Engineering, LLM-based workflows, and intelligent automation systems.
